The Power to Diagnose, The Confidence to Fix

Scan Tool Hub

With DrivePro 2 Plus, your garage can perform in-depth diagnostics on a wide range of makes and models using our 3x suites of aftermarket diagnostic software solutions.

Key Advantages:

- **Specialized European Diagnostics**
Autologic Legacy software delivers unparalleled diagnostic capabilities for European brands like BMW, Mercedes, Jaguar, Land Rover, and VW, allowing for in-depth analysis and accurate repairs.
- **Comprehensive Vehicle Coverage**
IVS Fix (Powered by Autocom) covers a wide range of vehicles for maximum coverage. While Also providing **Security Gateway** for FCA, VAG Mercedes, Ford, Renault & Iveco
- **Optimized Efficiency**
AutoEnginuity provides robust diagnostic support for a wide range of domestic, Asian, and European vehicles, ensuring your shop can handle more jobs efficiently.

Introducing Farsight OE Diagnostics

Farsight Mode is an innovation that takes the complexity out of accessing OEM software. It provides your shop with access to run multiple applications without the hassle of managing different laptops and hardware setups.

Key Advantages:

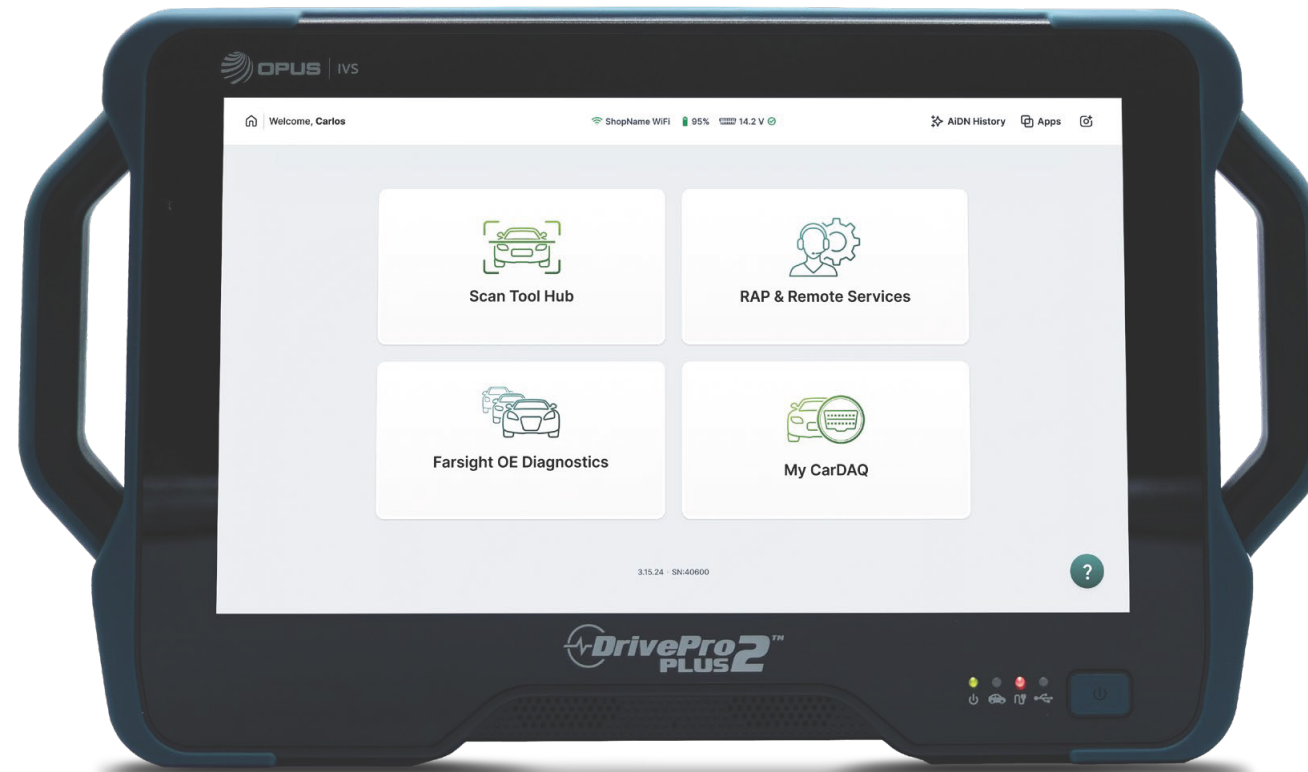

- **Streamlined Workflow**
No need for separate laptops. Farsight Mode centralizes all your OEM software into one device.
- **Saves Time & Costs**
Reduces the time and expense of purchasing, maintaining, and configuring multiple diagnostic laptops.
- **Enhanced Garage Efficiency**
Allows your team to move seamlessly between different OEM platforms without interruption.

RAP & Remote Services

With RAP (Remote Assisted Programming) and Live Remote Services, your shop gains access to expert support for complex programming and diagnostics. These services allow technicians to handle even the most advanced vehicle systems with confidence, reducing downtime and improving shop efficiency.

Key Advantages:

- **On-Demand Expertise**
Access specialized programming and diagnostic support when needed, allowing your team to focus on core tasks while our experts handle complex vehicle systems remotely.
- **Enhance Productivity**
By utilizing RAP and IVS360 support, shops can maintain control over repairs while reducing time spent on programming, enabling faster turnaround on other services.
- **Ensure Accuracy**
Precision in programming and diagnostics, minimizing the risk of errors and helping to maintain high standards without adding to your team's workload.

My CarDAQ

My CarDAQ Mode is one integrated system that combines the flexibility of a PC with powerful J2534 diagnostics, giving you everything you need in one place.

Key Advantages:

- **Full Customization**
Download and install the specific OE applications you need, tailored to your shop's workflow and supported by the integrated J2534 VCI.
- **Versatile Tools**
Beyond diagnostics, CarDAQ mode lets you run other valuable PC-based tools to broaden your shop's capabilities.
- **Online Access**
Easily browse the web for service information, resources, and support, all from within the same platform.

How Does Farsight Work?

Farsight Mode is a built-in library of pre-loaded OEM diagnostic software applications. Technicians access the software and log in as if they were using the OEM tools directly.

Please note, technicians will need their own OEM credentials to use the software.

AiDN-Industry First On-Tool AI Assistant

AI-powered diagnostic support delivers tips and suggestions as the first step in the diagnostic process. AiDN is the ideal complement to the live IVS 360 Tech Support.
